

## MEGA STONE

Fine Decorative Plaster Coating For Exterior and Interior Surfaces

### DESCRIPTION

- \* **MEGA STONE** is a ready mix fine elastic colored plaster for exterior and interior surfaces
- \* **MEGA STONE** is made of carefully selected fine quartz granules, colored with special standard colors with synthetic resins

### ADVANTAGES

- Non sag plaster coat, easy for application
- Has excellent properties of elasticity and adhesion to all smooth surfaces
- Excellent adhesion to concrete surfaces, cement plaster, wood ..etc
- Has a guaranteed durability, It doesn't chip, flake or peel even after many years
- Has high anti-static properties and does not attract air dust
- Inhibits flame spread, provides acoustical treatment
- Is vapor permeable and excellent water, acid and alkali resistance
- Easy to apply in one low coast operation using trowel, roller or sprayer
- White or colored to suit all tastes

### DIRECTION FOR USE

- Clean surfaces of dust, oils, grease and all impurities
- **MEGA STONE** can be used directly on all sound and dry surfaces and applied just like a plaster coating with a plaster's trowel
- For porous substrates it's recommended to prime plaster with one coat of **MEGA BOND** diluted 1:3 with water
- Using a stainless steel trowel apply **MEGA STONE** to substrate with average thickness approximately 1-2 mm which depends on the surface leveling
- Clean tools using water directly after application

### STRENGTH in Construction

**TECHNICAL INFORMATION**

<b>Density at 25° C</b>	1.78 ± 0.02 kg/l	<b>Ultra violet</b>	Non-yellowing
<b>Binder</b>	Acrylic co-polymer	<b>Dilution</b>	Water if necessary
<b>PH value</b>	7.5-8.5	<b>Rate of consumption</b>	2-2.5 kg/m2

**PACKAGES**

20 kg, 5 kg

**STORAGE**

6months in sealed packs, under suitable storage conditions.
